### Care & Cleaning

- Spot clean only with water-based shampoo or foam upholstery cleaner. Pretest a small, inconspicuous area before proceeding. Do not saturate or use solvents to spot clean. Pile fabrics may require brushing with a non-metallic, soft bristle brush to restore appearance or reset nap. Cushion covers should not be removed and laundered. To prevent overall soiling, frequent vacuuming or light brushing with a non-metallic, soft bristle brush to remove dust and grime is recommended. When cleaning a spill, blot immediately to remove spilled material. Evenly clean the entire panel in a seam to seam fashion and not just the spots or stains. When professional care is required, contact an IICRC Certified Firm who specializes in upholstery cleaning.
